

In claim 55, line 1, please replace "according to any one of claims 20 to 24" with
-according to claim 48--.

In claim 56, line 1, please replace "according to any one of claims 20 to 24" with
-according to claim 48--.

REMARKS

The above preliminary amendment is made to insert an abstract page into the application, to insert new claims for examination, and to remove multiple dependencies from the following claims: 31, 32, 33, 34, 35, 39, 40, 42, 44, 45, 46, 47, 51, 52, 53, 54, 55, and 56.

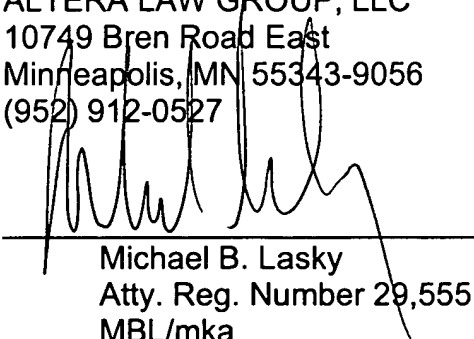

Applicant respectfully requests that this preliminary amendment be entered into the record prior to calculation of the filing fee and prior to examination and consideration of the above-identified application.

If a telephone conference would be helpful in resolving any issues concerning this communication, please contact Applicant's attorney of record, Michael B. Lasky at (952) 912-0527.

Respectfully submitted,

ALTERA LAW GROUP, LLC

29. A method for providing a service to a subscriber in a network, comprising the steps of:

- a) providing a network information related to said subscriber;
- 15 b) generating a service message on the basis of said provided network information; and
- c) transmitting said service message to said subscriber, characterized in that
- d) said network information is externally provided for a service provider (5); and
- 20 e) said service message is an external message generated by said service provider (5).

30. A method according to ^{claim 29} ~~claim 1~~, characterized in that

25 said network information relates to at least one of an identity, a location, an address, and an operating state of a mobile station (1) of the subscriber in a cellular network.

30

31. A method according to ^{claim 29} ~~claim 1 or 2~~, characterized in that

said service message is a local advertisement.

35

32. A method according to ^{claim 29} ~~claim 1 or 2~~, characterized in that

said service message is a header of an unread mail stored in a mail server.

33. A method according to ^{claim 29}~~claim 1 or 2~~,
characterized in that
said service message is a stock price change.

5 34. A method ^{according to claim 30}~~according to any one of claims 2 to 5~~,
characterized in that
said service message is transmitted when said mobile
station (1) is reachable according to the network
information.

10 35. A method ^{according to claim 30}~~according to any one of claims 2 to 6~~,
characterized in that
the network information of the subscriber is transmitted
by a network operator to the provider of the external
15 message in dependence on a predetermined subscriber
condition.

20 36. A method ^{according to claim 35}~~according to claim 7~~,
characterized in that
said predetermined subscriber condition is a request from
the subscriber.

25 37. A method ^{according to claim 36}~~according to claim 8~~,
characterized in that
said request is set by the mobile station.

30 38. A method ^{according to claim 36}~~according to claim 8~~,
characterized in that
said request is set by a network operator.

35 39. A method ^{according to claim 36}~~according to claim 8 or 9~~,
characterized in that
a network operator receives the request including a service
provider address, retrieves location coordinates of the
subscriber on the basis of a cell identification, and
transmits the location coordinates to the service provider
(5) using the received address.

40. A method ^{according to claim 30} ~~according to any one of claims 2 to 11,~~
characterized in that
the network information of the subscriber is transmitted in
a header of a packet transmitted by the mobile station (1).

41. A method ^{according to claim 40} ~~according to claim 12,~~
characterized in that
the network information is inserted by a network element
(8) in a second packet which encapsulates the packet
transmitted by the mobile station (1).

42. A method ^{according to claim 29} ~~according to any one of claims 1 to 6,~~
characterized in that
the network information of the subscriber is stored in a
storing means (7) in dependence on a predetermined
subscriber condition, and wherein said storage means (7) is
accessible to the service provider (5).

43. A method ^{according to claim 42} ~~according to claim 14,~~
characterized in that
the service provider (5) reads the storing means (7) by
using a predetermined key relating to the subscriber.

44. A method ^{according to claim 42} ~~according to claim 14 or 15,~~
characterized in that
said predetermined subscriber condition is a request from
the subscriber.

45. A method ^{according to claim 35} ~~according to claim 7, 14 or 15,~~
characterized in that
said predetermined subscriber condition is a subscription
parameter of the subscriber.

46. A method ^{according to claim 35} ~~according to claim 7, 14 or 15,~~
characterized in that

Sub

09748505-122600

said predetermined subscriber condition is an activation of a predetermined supplementary service.

47. A method ^{according to claim 35} ~~according to claim 7, 14 or 15,~~

5 characterized in that

said predetermined subscriber condition is the fact that the subscriber is located in his home area.

48. A system for providing a service to a subscriber in a network, comprising:

Sub
B1
A1
10 ✓a) providing means (7) for providing a network information related to said subscriber; and

15 ✓b) control means (6) for controlling the provision of said network information in dependence on a predetermined subscriber condition, characterized in that

c) said providing means (7) is arranged to externally provide said network information for a service provider connected to said network (5); and

20 d) said service provider (5) is arranged to generate an external message on the basis of said network information, said external message being transmitted to said subscriber.

49. A system ^{according to claim 48} ~~according to claim 20,~~

25 characterized in that

the network information relates to at least one of an identity, a location and an operating state of a mobile station (1) of the subscriber in a cellular network.

50. A system ^{according to claim 49} ~~according to claim 21,~~ characterized by

a data base for converting a cell identification of the mobile station (1) into a location thereof.

51. A system ^{according to claim 48} ~~according to any one of claims 20 to 22,~~ characterized in that

00974505 122500

the providing means (7) comprises a transmitting means for transmitting the network information of the subscriber to the service provider (5), wherein the control means (6) controls the transmitting operation in dependence on the predetermined subscriber condition.

92. A system ^{according to claim 48} ~~according to any one of claims 20 to 22,~~ characterized in that the providing means (7) comprises a storing means in which the network information of the subscriber is stored and which is accessible to the service provider (5), wherein the control means (6) controls the storing operation in dependence on the predetermined subscriber condition.

15 93. A system ^{according to claim 48} ~~according to any one of claims 20 to 24,~~ characterized in that said predetermined subscriber condition is a request from the subscriber.

20 94. A system ^{according to claim 48} ~~according to any one of claims 20 to 24,~~ characterized in that said predetermined subscriber condition is a subscription parameter of the subscriber.

25 95. A system ^{according to claim 48} ~~according to any one of claims 20 to 24,~~ characterized in that said predetermined subscriber condition is an activation of a predetermined supplementary service.

30 96. A system ^{according to claim 48} ~~according to any one of claims 20 to 24,~~ characterized in that said predetermined subscriber condition is the fact that the subscriber is located in his home area.
